

HCE project web administration interface user manual

Installation and configuration

Installation of web UI.

1) Download:

svn+ssh://alex@192.168.253.1/hce/dc-web-ui/trunk/app

svn+ssh://alex@192.168.253.1/hce/dc-web-ui/trunk/framework

2) Set "app" folder as Document Root in apache/nginx configuration.

3) In "project_path/app/protected/config" make a copy of "default.ini" and name it "config.ini".

4) Edit "config.ini".

5) Run "project_path/app/permissions.sh".

Installation of Users Rights Account Job (URAJ) module.

1) Create DB *dc_management*:

```
mysql>CREATE DATABASE dc_management; USE dc_management;
```

2) Create schema for users module:

```
mysql>source project_path/app/protected/modules/user/data/schema.mysql.sql
```

3) Create schema for account module (*account types / account limitations*):

```
mysql>source project_path/app/protected/modules/account/data/schema.mysql.sql
```

4) Sign in <http://dc-web-ui.dev/user/login> (Login/password: admin/admin)

5) Change setting install for rights module:

```
project_path/app/protected/config/main.php
```

```
'modules'=>array(
```

```
    'rights'=>array(
```

```
        'install'=>>true,
```

6) Follow the link for install rights module: <http://dc-web-ui.dev/rights/install>

7) Change setting install for rights module (rollback):

```
project_path/app/protected/config/main.php
```

```
'modules'=>array(
```

```
    'rights'=>array(
```

```
        'install'=>>false,
```

8) Create schema for roles/tasks/operations:

```
mysql> source project_path/app/protected/modules/rights/data/base_assignments.sql
```

9) Create schema for job module:

```
mysql> source project_path/app/protected/modules/job/data/schema.mysql.sql
```
